

Fully-automated feature, performance, and scalability testing of fixed-wireless broadband gateways

QA Cafe's CDRouter is the industry standard test solution for broadband CPE and Wi-Fi routers. Together with Amarisoft's AMARI Callbox, developers of fixed-wireless solutions have an easy, cost-effective way to connect their devices for repeatable, fully-automated testing in CDRouter.

Complete Fixed-Wireless Test Setup

The AMARI Callbox acts as a 3GPP-compliant eNB/gNB and EPC/5GC and comes in several models that meet your specific connectivity and performance goals.

All AMARI Callboxes integrate easily into your CDRouter test environment to access thousands of expertly developed tests covering feature, performance, and protocol certification for gateways over 5G/LTE.
